Sep, 2014

About the new Østfold Hospital @ Kalnes

- Net area: 85 500 m²
- Estimated cost: 5 billion NOK
- Completion: November 2015
- Currently Norway's largest construction site

Functional rooms:	3185
Technical rooms:	480
Elevators:	21
Floors:	
Doors:	7
Windows:	4282
Medical Technical Units:	284

Three high-level goals of simulation based solutions

1

Test, get to know and practice in the new physical premises

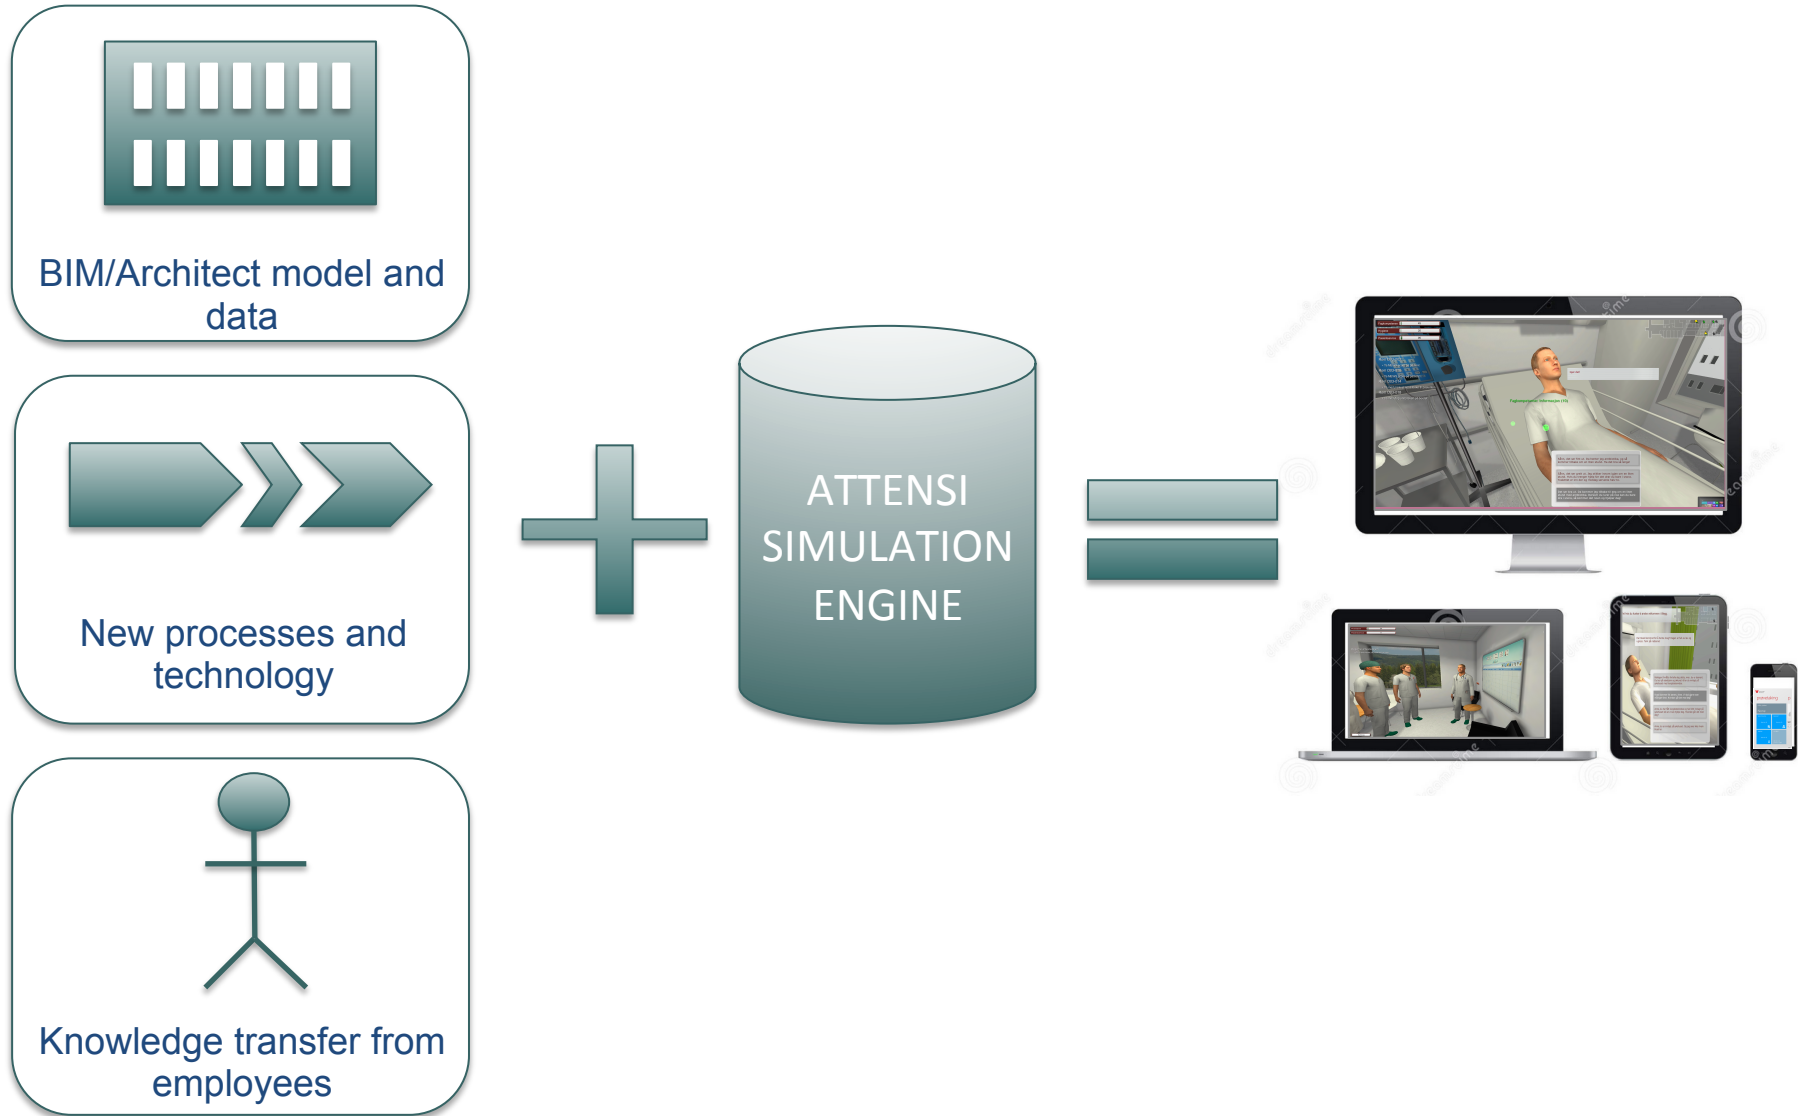

2

Test, get to know and practice the new technology and key processes

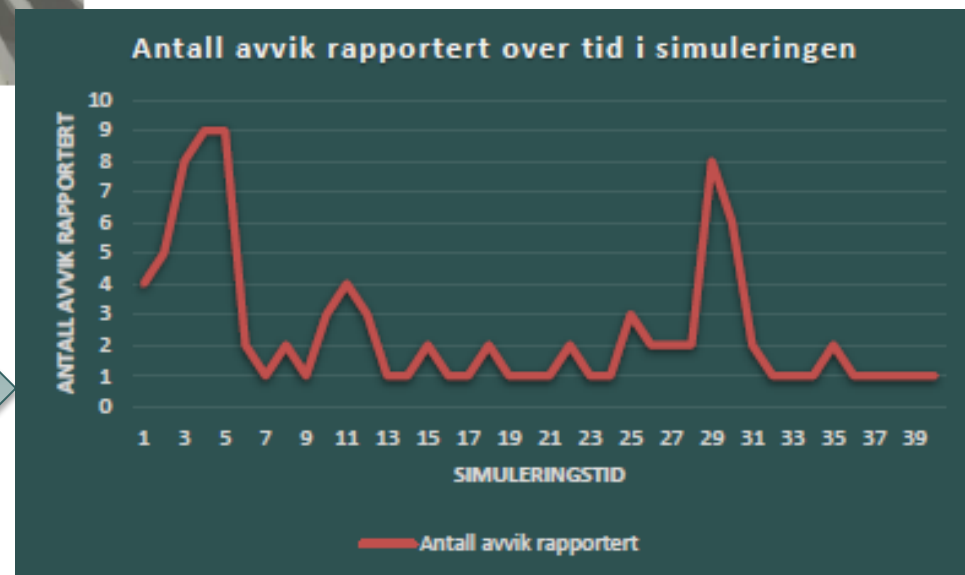

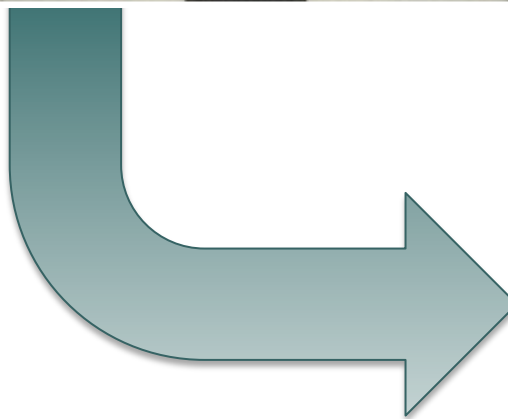

3

Improve the processes

The answer: build a set of realistic training simulators

DEMO - SØ

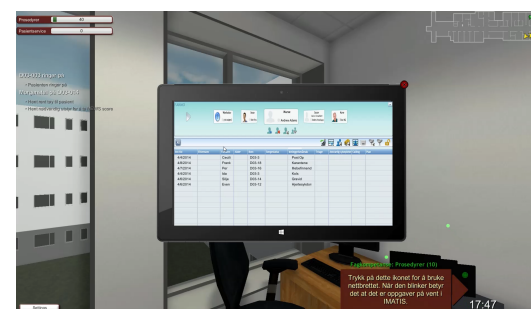

The simulation focuses on four key areas

Get to know the hospital

New technology

New processes

Process and layout improvements

attensi

Simulation based training
